Recognizing Talented Learners

As a teacher, you might come across talented and/or twice exceptional learners in your classroom. To heighten your awareness of these learners, read the hands-on information **Recognizing Talented Learners**. [Read more](#)

Kangaroo Corner

This strategy involves giving students who need a challenge, rewarding projects to develop for the benefit of their peers, preferably by organising learning centres within the classroom. [Read more](#)

Motivation through Individualization

The pillars of motivation are wellknown: discovery, individuality, cooperation and activity.

COOL IT: Cooperative Open Learning and Computational thinking for Everyone

Walli Project : Walli is a timetable and subject-independent elective course system.

Educating Talents' second TLA

In October 2023, our second Teacher Learning Activity (TLA) took place in Brussels, Belgium. For the 13 teachers who took part in this TLA, it was an excellent opportunity to (re)discover how to recognize the potential of their learners, to learn more about the Kangaroo strategy and to discover other methods of differentiation. They also had the chance to spend a day in the Future Classroom Lab (European Schoolnet), visit the House of European History and discover the historic centre of Brussels on a Magritte walk.

About us

Educating Talents is an Erasmus+ programme, and a unique collaboration between educational organisations from Austria, Belgium, France, Latvia, Sweden and The Netherlands. Educating Talents is intended to provide teachers with tools to support talented learners, to reach their full potential.
